

Parent Tips

1. Interact with your child in this space.
2. Take the time to help your child “read” the signs around them.
3. Practice your child’s math skills with the play money and price list.
4. Buy into their play — let your child tell you what to do and how to play with them.
5. Teach new vocabulary words like “cash register” and “watering can”.
6. Talk about science concepts — how things grow!
7. Check out a book about gardens afterwards.
8. Please respect this space and help your child clean up once they are done playing!
